DETAILED ACTION

NOTE TO APPLICANT:

Claims 29-31 are currently dependent from claim 42. This appears to be a mistake. The claims were grouped according to what would appear to be a reasonable dependency. Clarification is required prior to examination.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 16-24, 35-53, drawn to a method for treating coronary artery disease by administration of a growth factor, classified in class 514, subclass 2, for example.
 - II. Claims 25-27, drawn to a method for administration of a therapeutic by inhalation therapy, classified in class 424, subclass 489, for example.
 - III. Claims 28-34, drawn to a method of monitoring clinical effectiveness of a treatment, classified in class 436, subclass 501, for example.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are directed to methods which have distinct method steps, goals and/or starting materials. Furthermore, the methods have different modes of operation, different functions and different effects.

3. The inventions of each named pair can be shown to be distinct because they do not rely upon each other for their ultimate use and they require non-coextensive literature searches. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the necessity for non-coextensive literature searches, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christine Saoud, Ph.D., whose telephone number is (703) 305-7519. The examiner can normally be reached on Monday to Friday from 8AM to 3PM.
